Original Gear for Original Work

Beyond Diffusion.
Focused Light.

SMDV CINE SOFTBOX

A Focused Modifier Built for Cinema Production

The SMDV CINE Series is a focused cine modifier designed for high-output LED lighting up to 5000W, delivering both soft diffusion and intensified directional light exactly where it is needed.

WHY CINE?

Focused Light

Not just a softbox for diffusion — engineered to project light farther and stronger wher precision is required.

One-Touch Mount Adapter System

No drivers. No tools. Swap mounts in just one second. Compatible with A / NL / G / Bowens mounts for immediate adaptation to changing on-set lighting systems.

One-Touch Diffuser System

From front diffuser to inner diffuser — faster than ever. Reduce setup time with a one-touch system and create the exact light you need. (Deep)

Reduced Spill

Effectively minimizes unwanted light spread to surrounding areas.

Outstanding Center Output Even at 5 m

Up to 184% increase in center output vs. FlipBeauty24

+184%
Cine50: 54,367 lx
FlipBeauty24: 19,167 lx
